Other: Special directions, inspiration, sources, etc.	
Affix fiber samples to the left of the box by sewing or gluing. Attach the cloth at the top edge only by sewing or gluing with white Elmer's glue (archival). In this way we can lift the sample to see the back as well as feel both sides. The suggested size for the sample is indicated by the dotted lines of the box.	
Please print this form on card stock.	*EPI= Ends per inch

Spaces on this form are provided if you need them. It is

not necessary to fill in all of the blanks.

**PPI = Picks per inch

***Ends per dent =
